

Community Meeting - Open to the Public

Respiratory Health Survey of Taconite Workers and Spouses

Rangers continue to be contacted for the Respiratory Health Survey of Taconite Workers and Spouses. The University of Minnesota study team will hold informational meetings on May 11 about participation in the research study. The University is conducting a comprehensive study to determine whether exposure to dust from the taconite industry is harmful to taconite workers and their spouses.

Tuesday, May 11—5 p.m.
Hibbing Memorial Building
Downstairs Dining Room
400 East 23rd Street
Hibbing, MN 55746

Tuesday, May 11—7 p.m.
Coates Plaza Hotel
Chippewa Room
502 Chestnut Steet West
Virginia, MN 55792
