

Public Service Announcement for Taconite Study

University of Minnesota

Contact: Chad Kulas phone: 612-624-4604 email: ckulas@umn.edu

A health study of current and former taconite workers and spouses is currently being conducted by the University of Minnesota.

Participants selected randomly will receive a free exam at the Virginia Regional Medical Center that includes a chest X-ray, blood and lung tests. If you receive a letter, please call for more information. You can help future generations of miners and learn about your own health.

To learn more about the study, call 888-840-7590.
